

PRESS RELEASE

January 2023

Watercats for Danish Frontex Operations

Marine Alutech will deliver two Watercat 2000 Patrol to the **Danish Ministry of Defence Acquisition and Logistics Organisation DALO** together with our Danish partner **Topmark Trading**. The Watercat 2000 Patrols will operate on alert as part of Frontex operations of Danish Navy. They can operate in all climate conditions from freezing conditions in the winter to very warm and humid tropical conditions during summer.

The Watercats 2000 Patrol series is designed to perform coastal surveillance including a wide variety of other operations such as SAR, law enforcement, maritime safety, environmental protection, maritime accident and disaster response, fisheries control etc.

The Danish Ministry of Defence Acquisition and Logistics Organisation (DALO) is responsible for procurement, supply, maintenance, development and decommission of material capabilities, IT and services for the armed Danish forces and Emergency Agency.

Marine Alutech OY AB is a leader in design, manufacture, delivery, service & support of a range of sophisticated maritime vessels ideally suited for Military, Paramilitary, Law enforcement and Special Operations missions. The vessels range from 8-25m and can be manufactured in aluminium alloy and / or high-tech composite materials. The company has successfully delivered over 500 vessels since 1991.

Securing Seas. Together.
